Trust Automation Moves, Consolidates Facilities for Growth

San Luis Obispo, CA – 28 Feb 2008 – Trust Automation was founded in 1990. Over the years, like many companies, Trust Automation grew, expanded and eventually occupied our entire space. While once practical, business needs change, plans change and old spaces are no longer as useful as they once were.

Over the last ten years, we expanded from one to three locations, all close together but still separate. Today, we are proud to announce that we have consolidated our Manufacturing, Engineering and Sales & Marketing groups under one roof and increased our available space, as well as provided for greater potential for future growth.

Our new facilities are located at:

143 Suburban Road, Bldg. 100
San Luis Obispo, CA. 93401

About Trust Automation

Since 1990, Trust Automation provides motion control products and engineering services for the needs of many industries. Examples of these products and services are: Stand-alone motion and machine controllers, Linear Servo Amplifiers, SynqNet I/O and bridge products, Brushed and Brushless Rotary Motors and Engineering services covering Mechanical, Electrical, Software and System aspects of machine design. Our products reflect quality, robust performance, and ease-of-use; a refinement attained over many years of helping Original Equipment Manufacturers meet and exceed their goals.

Trust Automation provides comprehensive Engineering services to a broad range of industries including semiconductor equipment manufacturing, medical, entertainment, automotive, and military/aerospace. Our in-the-field experience with leading companies in these industries gives us the knowledge and experience to help you solve today's cutting edge, real world challenges, challenges that must be solved by new ideas; new ideas that Trust Automation transforms into the Smart Solutions of tomorrow.

Trust Automation's headquarters is in San Luis Obispo, on California's Central Coast.
